and Greet Van den Berghe

Report on a roundtable meeting
London, UK
17 June 2002

Supplement Editor: Jean-Louis Vincent

This supplement is based on presentations from a roundtable meeting held during the 4th International Conference on Sepsis in the ICU, London, UK, 17 June 2002, sponsored by Eli Lilly and Company.

The material presented herein is intended to be thorough, objective and balanced.

This sole-sponsored journal supplement is supported by an educational grant from Eli Lilly and Company.

The opinions and views expressed in this professional educational supplement are those of the authors and do not necessarily reflect the opinions or recommendations of the publisher or Eli Lilly and Company. Lilly provided editorial assistance where necessary to produce the supplement, subject to complete and final editorial control by the authors: the manuscript is being published with the authors' full knowledge and consent. Lilly verified the accuracy and/or completeness of scientific information involving its research and reviewed manuscripts with regard to protecting the company's intellectual property rights. Dosages, indications, and methods of use for the products that are referred to in this supplement by the authors may reflect their research or clinical experience, or may be derived from professional literature or other sources. Because of differences between in vitro and in vivo systems and between laboratory animal models and clinical data in humans, in vitro and animal data may not correlate with clinical results and do not demonstrate clinical safety or efficacy in humans.
